

Periodically remove top layer of sand as needed to remove grease, scum, etc., and replace with clean sand.

Fill 24" space between the sides of the excavation and the outside of the drum with clean gravel.

Note: 1. This method of disposal may only be used with suitable soils as determined and accepted by the local health district.

2. Locate waste water drains within 200 feet of all campsites.

3. Waste water drains on individual sites are prohibited.
